

KYIV, UKRAINE – 9 MARCH 2016 – Business Matchmaking Workshop organized by the State Space Agency of Ukraine as part of Project "UKRAINE" (UKraine Replication, Awareness and INnovation based on EGNSS, funded by the EU Research and Innovation program Horizon 2020 – GALILEO-3-2014) is now open for registration. All key stakeholder and influencers are invited to participate.

Date: 16 March 2016

Time: 9.30 – 17.00

Venue: Great Conference Hall of the National Academy of Sciences of Ukraine - 55 Volodymyrska str., Kyiv, Ukraine

The official languages of the workshop are English and Ukrainian.

The main objectives of the Business Matchmaking Workshop are:

- To provide an overview of the potential of GNSS globally and in Ukraine in particular, highlighting the specific areas in which applications are developed and widespread
- To present the most significant areas of excellence of the Ukrainian economic context for the extension of EGNSS (EGNOS)
- To create networking opportunities for Ukrainian and European entities which are key stakeholders and influencers in the area of GNSS

THE AGENDA

09.30 – 10.00 Registration of participants

10.00 – 13.30 Welcome remarks from Ukrainian partner (SSAU)

Welcome remarks from European partners (European Commission, UKRAINE project coordinator, GSA, ESA, Twinning project coordinator)

Legal and technical issues of EGNOS extension to Ukraine (SSAU)

13.30 – 14.30 Lunch

14.30 – 15.30 Reports and presentations of representatives of key Ukrainian stakeholders and influencers

15.30 – 16.30 Discussions in the sectoral working groups:

EU experience of EGNOS implementation in different industrial spheres:

- maritime and inland waterways
- road transport
- agriculture

Discussion of the outlook of EGNOS implementation in different industrial spheres of Ukraine (obstacles and opportunities)

Participants: Representatives from Ukrainian Ministries and institutions and European representatives of business cases and best practices.

16.30 – 17.00 Q&A, conclusion

About Project UKRAINE

UKraine Replication, Awareness and INnovation based on EGNSS

The UKRAINE project was established in January 2015 to capitalize on opportunities for partnerships created by the finalization of the EU-Ukraine Cooperation Agreement in the field of Global Navigation Satellite Systems (GNSS). It was created with the aim of strengthening Europe's position as a major space player with Galileo and EGNOS in the Ukrainian market of GNSS applications, by laying the groundwork for research and development as well as commercial alliances between existing entities. Achieving these objectives will create business opportunities in Ukraine for both national and European companies, as well as generating public benefits for the Ukrainian economy and public good.

Key components to the project are preparation of the Ukrainian aviation market to the extension of EGNOS, identification of legislative options to support the uptake of European GNSS, development of solutions for multimodal logistics and dangerous goods transport, and fostering commercial relationships between enterprises in both Ukraine and EU Member States.

This project received funding from the European GNSS Agency within the EU Research and Innovation program Horizon 2020 under the Grant Agreement No. 641517.
